

# Elbow Making Machine

In HVAC duct work, the elbow is widely used for corners and turnings, the traditional manual work is heavy and noisy. You can easily make the elbow by this machine, without hard work and noise round your head. The Hydraulic type has 2 operation station and a higher efficiency which can make an 8" elbow in 90 seconds.

## Technical Data

Model	EM600
Material Thickness	0.4~1.5mm Galvanized Steel/Aluminum
	0.4~0.6mm Stainless Steel
Diameter Range	125~1250mm (5"~50")
Main Motor	5 KW
Flanging Speed	Up to 120m/min
Dimension	1650x800x1100mm
Weight	620Kg
