

The PVC flexible air duct uses steel wire as the bone, PVC coated polyester weave as the duct body, which is flexible and easy to bend, heat resistance. The flexible duct is widely used in airport jetway ventilation, sewer air supply and connection in HVAC system.

PVC Flexible Duct Machine PFT - Multi function flexible air duct machine

Standard Features

- ▶ For reinforced flexible duct production
- ▶ Variety material choice, PVC coated polyester weave, nylon, chemical fabric
- ▶ Fast & Easy for diameter changing
- ▶ Duct diameter ranging from 100~600 mm, other diameter on request
- ▶ 7 Sets of forming rollers
- ▶ Welded structure, easy for transporting
- ▶ Non- heating locking design, fast & energy saving, low request on material

Technical Data

Model	PFT
Tube Diameter	4"~23"(100mm~600mm) Other Diameter on request
Raw Material Type	Nylon, PVC coated polyester weave, PVC fabric
PVC Strip width	45~120mm
Raw material Thickness	0.2mm~1.0mm
Reinforced strip	steel strip 9mm~12mm
Steel strip thickness	0.3~0.8mm
Ducting Speed	Up to 6 m/min
Power	1.5KW
Dimension	2100*850*1600mm
Weight	300Kg
